The Multiplier is determined by the NEEDLE SIZE; the yarn weight does not matter. Here is an example of how the formula works:

Example of how the Formula works

To cast-on 75 stitches using a US # 8 needle, use the formula to calculate the # of inches of yarn to cast-on.

- # of stitches to cast-on divided by 10 = "A"
- "A" multiplied x Multiplier = "B" (# of inches
